Your Renovation Solution

ReWald Installation Guide

Tools Needed

- Hammer
- Step Ladder
- Nail / Tack Gun
- Air Compressor
- Saw Horses
- Adhesive (*Loctite PL375*)
- Circular Saw
- Sabre Saw

STEP 1

Panel Installation

Measure the area where you would like to install the first panel. Include measurements for all cutouts.

STEP 2

Using the saw horses and circular saw, cut out the desired panel size. Using the Sabre saw, cut out switch socket and openings.

Using measurements from Step 1 to guide you.

STEP 3

Apply construction adhesive to the backside of the panel in a zigzag pattern.

STEP 4

Fit the panel to the wall.

STEP 5

Starting in the middle of the panel edge, use your nail / tack gun to fasten panel(s) to the wall.

Repeat steps 1-5 for all remaining panels.

STEP 6

Batten Installation

Cut to desired length and fasten over the panel seams using the nail / tack gun.

Repeat for all remaining batten strips.

Cleaning Guide

Surfaces can be wiped down with a warm damp clean cloth using a diluted dish soap mixture. When using cleaning solutions for a deeper clean, products should not be sprayed directly onto the surface.

Since 1981 Waldan Paper Services, LLC has been providing quality and innovative solutions to the Manufactured Housing Industry.
